# Avant-propos

Le programme *Découvrir le sens du nombre* contient des éléments nécessaires à l'enseignement du sens du nombre ainsi que des quatre opérations de base en mathématiques, soit l'addition et la soustraction, la multiplication et la division. Toutes les activités et leur raisonnement doivent se rattacher au vécu quotidien des adultes en apprentissage.

Ce programme est présenté comme suit :

<b>Partie A</b>	<i>Guide pratique à l'intention des enseignantes</i>	
	Chiffres et nombres (Module 1 : bleu)	Une réflexion... Des activités suggérées
	Addition et soustraction (Module 2 : jaune)	Une réflexion... Des activités suggérées Annexes 1-4
	Multiplication et division (Module 3 : rouge)	Une réflexion... Des activités suggérées Annexe 1
	Fiches d'activités laminées	Modules 1, 2 et 3

De façon brève et générale, le *Guide pratique à l'intention des enseignantes* offre des pistes et des stratégies d'enseignement des mathématiques de base aux adultes. Ces stratégies leur permettront de découvrir le sens des nombres en jouant et en s'amusant, tout en développant plus d'habiletés. La **Partie A** met en pratique cette nouvelle réflexion en mathématiques. Le guide, ainsi que les réflexions, les activités suggérées et les fiches d'activités laminées, se veulent une intégration naturelle des mathématiques dans le processus d'apprentissage.

<b>Partie B</b>	Chiffres et nombres (Module 1)	Cahier d'exercices I
	Addition et soustraction (Module 2)	Cahier d'exercices I
	Multiplication et division (Module 3)	Cahier d'exercices II

La **Partie B** présente des feuilles d'exercices que les adultes en apprentissage peuvent faire avec leur enseignante, selon les besoins individuels des adultes.

Comment comprendre et faire les mathématiques?

- Présenter, de façon explicite, des activités pratiques liées au vécu des adultes et des exercices de résolution de problèmes authentiques. (Voir *Fiches d'activités*.)
- Entrecouper les activités par des exercices de calculs arithmétiques qui permettent d'ancrer les faits mathématiques. (Voir *Cahier d'exercices I* et *Cahier d'exercices II*.)
- Estimer des réponses aux calculs.
- Exercer le calcul mental pour pratiquer la rapidité et développer des stratégies.
- Vérifier le calcul estimé ou mental.
- Utiliser la calculatrice.
- Jouer, jouer et jouer pour apprendre et, ah oui, ne pas oublier de s'amuser!

Vite! À vos calculs!

*Les auteures*

**Note sur la féminisation**

La forme du féminin est utilisée partout dans ce document pour refléter l'apport important des femmes dans la prestation des services en alphabétisation et en formation de base.

# X = X

## Vocabulaire

<b>=</b>	<b>«est égal à» ou «égale»</b>
<b>multiplication</b>	Opération par laquelle on répète un nombre autant de fois qu'il y a d'unités dans un autre
<b>multiplier</b>	Action de faire la multiplication
<b>produit</b>	Réponse de la multiplication
<b>fois</b>	En multiplication, «fois» est représenté par le symbole «X» Exemple : «3 x 2 = 6» se lit «3 fois 2 est égal à ou égale 6»

$$X = X$$

## Les mathématiques dans la vie de tous les jours

### Les multiplications

Quand dois-je multiplier?

Mon expérience avec les multiplications

**Directives**

- Lis.

- Dis.

$3 \times 2 = 6$   
trois fois deux  
«est égal à» six  
ou «égale» six

- Écris.

**Questionne toujours au besoin!**

$$X = X$$

## Outils

- un crayon

- une calculatrice  
une calculette

- une gomme à effacer

- une règle

**Révision**

**Compte par bonds de «2». Encerle le chiffre approprié.**

**Exemple :** 3    **4**    5    **6**    7    **8**    9    ...

<b>1</b>	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

$6 \times 9 = 54$

$7 \times 9 = 63$

$8 \times 9 = 72$

$9 \times 9 = 81$

$10 \times 9 = 90$

**Multiplie.**

$9 \times 0 = \underline{\hspace{2cm}}$

$9 \times 7 = \underline{\hspace{2cm}}$

$9 \times 1 = \underline{\hspace{2cm}}$

$9 \times 4 = \underline{\hspace{2cm}}$

$9 \times 2 = \underline{\hspace{2cm}}$

$9 \times 8 = \underline{\hspace{2cm}}$

$9 \times 3 = \underline{\hspace{2cm}}$

$9 \times 5 = \underline{\hspace{2cm}}$

$9 \times 4 = \underline{\hspace{2cm}}$

$9 \times 3 = \underline{\hspace{2cm}}$

$9 \times 5 = \underline{\hspace{2cm}}$

$9 \times 6 = \underline{\hspace{2cm}}$

$9 \times 6 = \underline{\hspace{2cm}}$

$9 \times 2 = \underline{\hspace{2cm}}$

$9 \times 7 = \underline{\hspace{2cm}}$

$9 \times 0 = \underline{\hspace{2cm}}$

$9 \times 8 = \underline{\hspace{2cm}}$

$9 \times 7 = \underline{\hspace{2cm}}$

$9 \times 9 = \underline{\hspace{2cm}}$

$9 \times 9 = \underline{\hspace{2cm}}$

$9 \times 10 = \underline{\hspace{2cm}}$

$9 \times 3 = \underline{\hspace{2cm}}$

$9 \times 9 = \underline{\hspace{2cm}}$

$9 \times 4 = \underline{\hspace{2cm}}$

$9 \times 10 = \underline{\hspace{2cm}}$

$9 \times 9 = \underline{\hspace{2cm}}$

**Complète les multiplications.**

$9 \times 10 = \underline{\hspace{2cm}}$

$9 \times 9 = \underline{\hspace{2cm}}$

$9 \times 4 = \underline{\hspace{2cm}}$

$9 \times 5 = \underline{\hspace{2cm}}$

$9 \times 6 = \underline{\hspace{2cm}}$

$9 \times 8 = \underline{\hspace{2cm}}$

$9 \times 9 = \underline{\hspace{2cm}}$

$9 \times 3 = \underline{\hspace{2cm}}$

$9 \times 0 = \underline{\hspace{2cm}}$

$9 \times 6 = \underline{\hspace{2cm}}$

$9 \times 1 = \underline{\hspace{2cm}}$

$9 \times 4 = \underline{\hspace{2cm}}$

$9 \times 3 = \underline{\hspace{2cm}}$

$9 \times 2 = \underline{\hspace{2cm}}$

$9 \times 5 = \underline{\hspace{2cm}}$

$9 \times 3 = \underline{\hspace{2cm}}$

$9 \times 6 = \underline{\hspace{2cm}}$

$9 \times 4 = \underline{\hspace{2cm}}$

$9 \times 2 = \underline{\hspace{2cm}}$

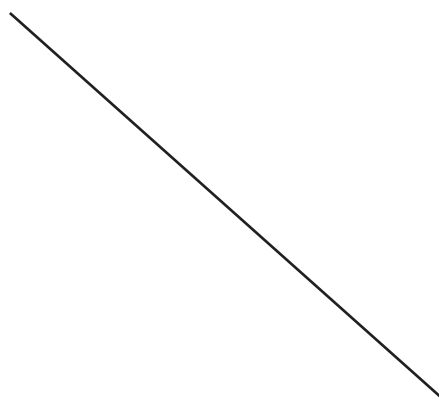

$9 \times 9 = \underline{\hspace{2cm}}$

$9 \times 4 = \underline{\hspace{2cm}}$

$9 \times 9 = \underline{\hspace{2cm}}$

Relie la multiplication au produit.

Exemple :	$2 \times 6 =$	0
	$4 \times 6 =$	81
	$9 \times 0 =$	40
	$9 \times 9 =$	12
	$8 \times 5 =$	24
	$8 \times 4 =$	8
	$8 \times 1 =$	90
	$6 \times 0 =$	0
	$9 \times 10 =$	32
	$9 \times 6 =$	54
	$4 \times 4 =$	16
	$8 \times 7 =$	56

## Vocabulaire

<b>division</b>	10 ÷ 2 = 5 10 divisé par 2 égale 5 dix divisé par deux est égal à 5 5 est le <b>quotient</b>
÷	<b>divisé par</b> divise forme des groupes
=	<b>«est égal à» ou «égale»</b> même quantité autant

## Les mathématiques dans la vie de tous les jours

### Les divisions

#### Où sont les divisions?

##### Exemples :

- *diviser*
- *groupes*
- *sous-groupes*
- *combien de fois*
- *diviseur*
- *la moitié*
- *le tiers*
- *le quart*
- *les parties, les morceaux*
- *partager*
- *séparer*

#### Mon expérience avec les divisions

## Directives

- Lis.

- Dis.

$6 \div 3 = 2$   
six divisé par trois  
«est égal à» deux  
ou «égale» deux

- Écris.

**Questionne toujours au besoin!**

## Outils

- un crayon

- une calculatrice  
une calculette

- une gomme à effacer

- une règle

## Les groupes

On divise 12 adultes en groupes.

## La division

Voici un ensemble de 6 éléments.

Forme des groupes de 2.

$$6 \div 2 = 3$$

la division

Souviens-toi :

$$2 \times 3 = 6$$

la multiplication

Forme des groupes de 3.

$$6 \div 3 = 2$$

la division

Souviens-toi :

$$2 \times 3 = 6$$

la multiplication

**La division est l'opération inverse de la multiplication.**

## Exercices

Divise également ces 6 pommes dans les 2 bols. Utilise ta règle.

la division  $6 \div 2 = \underline{\quad}$

la multiplication  $2 \times \underline{\quad} = 6$

Voici 6 tasses. À l'aide d'une règle, place un montant égal de tasses sur chaque plateau.

la division  $6 \div 3 = \underline{\quad}$

la multiplication  $3 \times \underline{\quad} = 6$

## Exercices

Partage également ces 9 bonbons entre les 3 enfants.

la multiplication  $3 \times \underline{\quad} = 9$

la division  $9 \div 3 = \underline{\quad}$

Combien de bonbons chaque enfant reçoit-il?

Divise également 15 perles sur 5 ficelles.

la multiplication  $5 \times \underline{\quad} = 15$

la division  $15 \div 5 = \underline{\quad}$

Trouve le quotient.

$$12 \div 2 = \underline{\quad}$$

$$12 \div 6 = \underline{\quad}$$

$$6 \div 3 = \underline{\quad}$$

$$6 \div 2 = \underline{\quad}$$

Combien de groupes égaux y a-t-il?

$15 \div 3 =$  \_\_\_\_\_

$15 \div 5 =$  \_\_\_\_\_

$12 \div 3 =$  \_\_\_\_\_

$12 \div 4 =$  \_\_\_\_\_

$18 \div 3 =$  \_\_\_\_\_

$18 \div 6 =$  \_\_\_\_\_

$18 \div 3 =$  \_\_\_\_\_

$21 \div 7 =$  \_\_\_\_\_

Combien de groupes égaux y a-t-il?

$10 \div 5 = \underline{\quad}$

$10 \div 2 = \underline{\quad}$

$15 \div 5 = \underline{\quad}$

$15 \div 3 = \underline{\quad}$

$40 \div 5 = \underline{\quad}$

$40 \div 8 = \underline{\quad}$

$30 \div 5 = \underline{\quad}$

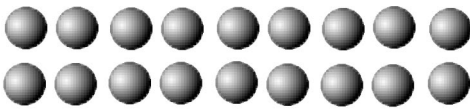

$30 \div 6 = \underline{\quad}$

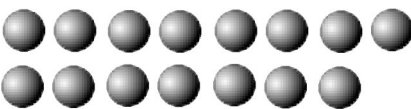

Divise en groupes de 3.

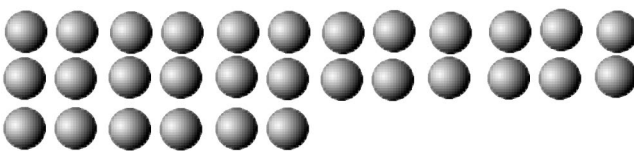

Combien de groupes?

$18 \div 3$  

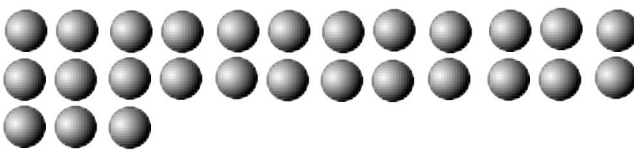

\_\_\_\_\_

$15 \div 3$  

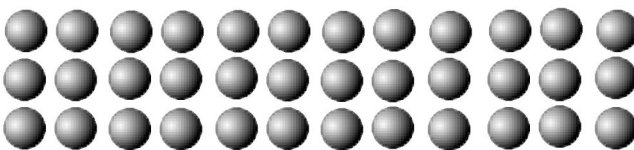

\_\_\_\_\_

$30 \div 3$  

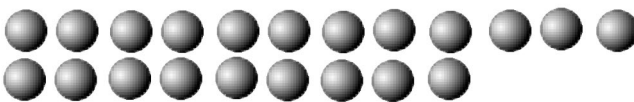

\_\_\_\_\_

$27 \div 3$  

\_\_\_\_\_

$36 \div 3$  

\_\_\_\_\_

$21 \div 3$  

\_\_\_\_\_

$9 \div 3$  

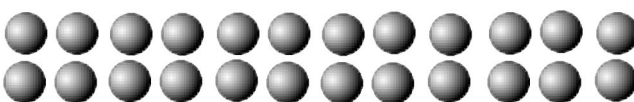

\_\_\_\_\_

$3 \div 3$  

\_\_\_\_\_

$6 \div 3$  

\_\_\_\_\_

$24 \div 3$  

\_\_\_\_\_

De façon brève et générale, le *Guide pratique à l'intention des enseignantes* offre des pistes et des stratégies d'enseignement des mathématiques de base aux adultes. Ces stratégies leur permettront de découvrir le sens des nombres en jouant et en s'amusant, tout en développant plus d'habiletés. La **Partie A** met en pratique cette nouvelle réflexion en mathématiques. Le guide, ainsi que les réflexions, les activités suggérées et les fiches d'activités laminées, se veulent une intégration naturelle des mathématiques dans le processus d'apprentissage.

La **Partie B** présente des feuilles d'exercices que les adultes en apprentissage peuvent faire avec leur enseignante, selon les besoins individuels des adultes.
